

GlidePack MultiTrack 25

Advantages

- Multiple stages of filtration in a short 25" deep housing with tracks are adaptable to accommodate a 2" or 4" deep prefilter, a 2", or 4" deep intermediate particulate or carbon filter, and a 6" or 12" deep rigid or pocket final filter
- Less than 1/2 of 1% leakage guaranteed
- Housing efficiency equal to the applied filtration efficiency

Typical applications: Two-stage filter housing for commercial, industrial, manufacturing or medical facilities.

Construction: 16-gauge galvanized steel with standing flanges, dual access doors, UV-resistant door knobs, door and filter sealing gasketing and pneumatic taps for installation of static pressure gauge(s).

Filters: MERV filters, a 2" or 4" deep prefilter, a 2", or 4" deep intermediate particulate or carbon filter, and a 6" or 12" deep rigid or pocket final filter.

Performance: Rated airflow 500 fpm, may be operated to 625 fpm. Standard model operational to ± 6.0" w.g.

Additional data: Sizes available from 4 filters high to 6 filters wide. Housing is weatherproof for outside installation without modification. Available with insulation, primed for painting, or in stainless steel construction. Consult factory.

See Literature 2425 for more details.
